

FIADEK® Capsules

Technical Memory

Indications

FIADEK® Capsules, is a formula which integrates fat-soluble vitamins A, D, E and K, suitable for the dietary and nutritional treatment of clinical situations that have malabsorption and bad digestion of these vitamins, antioxidants and other nutrients soluble in fat. Among others, Cystic Fibrosis.

FIADEK® Capsules, Food for Special Medical Purposes, is specially formulated for the management of clinical situations that present malabsorption of vitamins, minerals and other nutrients soluble in fat. In addition, to meet the requirements of daily vitamin supplementation of patients affected from cystic fibrosis in accordance with the recommendations of the International Guide on Vitamin Supplementation in C.F. **FIADEK® Capsules** also has incorporated vitamin E, vitamin C and Zinc as antioxidants. Vitamins D and K present in this formula provide the protection and improvement in bone health.

The formulation of **FIADEK® Capsules** in softgel capsules, with HALAL certification, has been developed to facilitate high absorption of the entire component and to minimize the number of daily intakes.
